

Attachment #1
OSA 0246-69

ANNEX 1

OPERATIONS

I. Concept of Operations:

A. Project Headquarters will utilize the airlift capability of the C-130 Detachment in support of Headquarters requirements. These requirements and others associated with the Headquarters mission will be processed IAW Headquarters Directive 45-3 (Attach).

B. Operational control of aircraft will be vested in Project Headquarters. All support missions will be scheduled and monitored by Control Center, Project Headquarters.

II. Operational Responsibilities:

The C-130 Detachment Commander will be responsible for the following:

A. Coordination with Host Organizational Maintenance Squadron to insure assigned C-130 is maintained in a high operational ready status. Direct coordination is authorized with WRAMA for scheduling phase, etc maintenance.

B. Insure assigned crew members are initially well qualified in their flight specialities and that a high degree of professionalism is maintained by each crew member.

C. Establish procedures for Detachment to operate in a manner which will provide effective utilization of assets. SOPs should be submitted to Headquarters for approval prior to publication.

D. Insure airlift missions are accomplished IAW Project Directive 45-3 and that all operations are conducted IAW applicable Air Force Regulations and Manuals as supplemented by host base.

E. Maintain a focal point for message traffic with Control Center, Project Headquarters. Establish adequate control of all command cable traffic for utilizing the Det 42 secure communications.
